☎ +91 6382862595

Enthusiastic and reliable developer with a strong knowledge of web development with 1.6+ years of industry experience as part of a computer program development team.

### Skills

- Javascript
- HTML
- CSS
- Java
- React
- Git-hub
- Firebase

- Express-js
- Node-js
- MongoDB
- Bootstrap
- AWS
- React-Bootstrap

### Projects

- Pizza order Application
- Instagram-clone
- Whatsapp-clone
- Netflix-clone
- Rental Application

### Project Description

- Server-side
  - Testing route api's using postman.
  - For Authentication purpose, I have used bcryptjs and jsonwebtoken.
  - CORS for security mechanism.
  - To create environment variables, I have used dotenv.
  - Express for Nodejs web application framework to manage servers and routes
  - DB used - MongoDB Atlas for cloud level data storage
  - Created schemas and models using mongoose
  - Configured email services using Nodemailer
  - For speedy development of nodejs application I have used Nodemon - which automatically starts the server once saved
  - Razorpay for payment gateway
  - To check the correctness of the fragments of code I have utilized validator
  - For real time communication layer between server and client, I have achieved it instantly using Pusher
  - For movie database I have used TMDB Api's

## ● Client-side

- Building interactive user interface quickly using ReactJs
- For light weight CSS Framework - Material UI, Bootstrap and React-bootstrap
- To simplify redux development I have used ReduxJs toolkit
- Antd to create elegant components
- Axios - for HTTP request handling
- To manage forms with complex validation with ease Formik has been used
- Moment - to display date as per localization
- To display dates using calendar dialog format React Datepicker has been used
- React Icons to add Icons
- Advanced state management using React-redux
- Dynamic routing in web application using React-router-dom
- For toast notification - React-toastify
- React hooks for reusability, readability and testability
- For Authentication Firebase has been used
- To send emails using client-side applications like React I have used Emailjs

## Experience

● Graduate Engineering Trainee, SFL(TVS)

2017 - 2018

● Associate Professional, DXC Technology.

2022 - Current

## Education

● B.E-Mechanical Engineering,  
Nehru Institute of Technology, Coimbatore.

2013 - 2016

● Diploma In Mechanical Engineering,  
Rajagopal Polytechnical College, Vellore.

2010 - 2013

## Certifications

● Certification of Full Stack Development in MERN Stack from GUVI Geek Networks, IITM Research Park

## Declaration

I hereby declare that the above mentioned information is true

Thanks & Regards
